Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

COMPANY PROFILE

SUMMARY

Cara Therapeutics is a privately held company focused on developing therapeutics for pain and inflammation.

LICENSING AGREEMENTS

In March 2006, Tripos (through its Tripos Discovery research arm) agreed to use its computational and medicinal chemistry expertise to support Cara's pain and inflammation drug programs.

FINANCIAL

In July 2010, Cara raised \$15 million from a series D financing round.

In November 2006, Cara raised \$19 million from the first tranche of a \$24 million series C financing round; the company closed the second tranche of \$5 million in February 2007. In July 2008, Cara raised \$12.3 million in third tranche of the series C financing round.

EARLY R&D/TECHNOLOGY NEWS

Cara's proprietary DimerScreen technology is designed to specifically and selectively identify molecules interacting with GPCR dimers and allows for the discovery of compounds with new pharmacological properties at identified dimeric drug targets.
