ABOUT COMPANY AND PIPELINE OVERVIEW REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

Cortellis Company and Pipeline Overview reports are the first in a series of reports that track pharmaceutical and biotechnology companies worldwide. Further report offerings planned to follow include: Company Detailed Pipeline and Company Competitive Landscape reports. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from a significant number of global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence*

DISCLAIMER

The information contained in this report is based on sources believed to be correct but Thomson Reuters does not guarantee the accuracy, timeliness, or completeness of this information. Opinions, if any, are those held by the author of any individual report or article at the time of initial publication and do not necessarily reflect the views of Thomson Reuters.

Information in this report on companies is intended for reference use only, and does not constitute a recommendation to buy or sell any particular security or other investment and does not constitute an offer to buy from or sell to any particular investor. Any company or securities mentioned in this report may not be suitable for any particular investor, depending on that investor's financial position and needs.

GLOSSARY

Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

FibroGen Inc

COMPANY OVERVIEW

Company Name	FibroGen Inc
Parent Company Name	FibroGen Inc
Website	http://www.fibrogen.com/
Country	US
Number of Drugs in Active Development	6
Number of Inactive Drugs	6
Number of Patents as Owner	70
Number of Patents as Third Party	2
Number of Deals	12
Key Indications	Anemia, Myocardial infarction, Stroke, Focal segmental glomerulosclerosis, Diabetic nephropathy, Glioma, Idiopathic pulmonary fibrosis, Multiple sclerosis, Pancreas tumor, Glaucoma, Liver fibrosis, Renal injury
Key Target-based Actions	HIF prolyl hydroxylase inhibitor, TGF beta antagonist, Connective tissue growth factor ligand inhibitor, Bone morphogenetic protein-1 ligand inhibitor, HIF prolyl hydroxylase-1 modulator, Albumin modulator, Angiotensin receptor antagonist, CD66e antagonist, CTGF gene inhibitor, Calcineurin inhibitor, Collagen III agonist, Desmin inhibitor, Dopamine receptor agonist, Erythropoietin receptor agonist, HIF prolyl hydroxylase-1 inhibitor, IL-6 agonist, LDL receptor antagonist, Prolyl hydroxylase inhibitor, TGF beta agonist
Key Technologies	Small molecule therapeutic, Biological therapeutic, Oral formulation, Peptide, Protein recombinant, Capsule formulation, Infusion, Intravenous formulation, Monoclonal antibody human, Antibody, Drug combination, Monoclonal antibody, Oligonucleotide

COMPANY PROFILE

SUMMARY

FibroGen Inc, founded in 1994, is a privately held biotechnology company which has developed the only commercially viable method known to produce human collagen and human gelatin in recombinant systems. The company's therapeutic target areas include fibrotic disorders affecting the major organs, diabetes, surgical procedures, and fibroproliferative tumor progression and metastasis.

COMPANY LOCATION

Fibrogen's headquarters are in San Francisco, CA. Fibrogen Europe, a subsidiary of Fibrogen based in Helsinki, Finland, is a biotechnology focused enterprise that specialises in the development of recombinant collagens and gelatins.

LICENSING AGREEMENTS

In January 2001, FibroGen and Aventis Pasteur formed a collaboration agreement to develop, using FibroGen's proprietary technology, novel synthetic gelatins with the potential to confer optimum stabilization and activity attenuation specific for certain Aventis Pasteur vaccines.

As of October 1999, FibroGen had a research and development agreement with Medarex Inc to develop monoclonal antibodies to block the fibrogenic cascade. In July 1998, FibroGen signed an agreement with Medarex for the use of the HuMab mouse antibody technology to develop potential antifibrotic therapies using FibroGen's proprietary targets.

In September 1999, FibroGen announced a collaboration with Taisho Pharmaceutical Co Ltd to develop and commercialize human monoclonal antibodies for the treatment of fibrotic kidney diseases; however, no development has been reported by Taisho since May 2002 and in August 2005 this strategic alliance was not listed on FibroGen's website.

In 1997, FibroGen licensed ArQule's Mapping Array program to discover and develop drug candidates for fibrosis and excessive scarring; however, since 2002, no development had been reported on this deal.

[Return to Table of Contents](#)

EARLY R&D/TECHNOLOGY UPDATES/IP NEWS

In December 1998, FibroGen received US-05837258, covering the use of connective tissue growth factor to induce the repair of connective tissue, including bone, cartilage and skin.

As of June 1998, programs were underway at FibroGen for the development of small-molecules which modulate collagen scar formation and human antibodies to neutralize cytokine and enzyme targets.

FINANCIAL

In February 2005, FibroGen raised net proceeds of \$100 million from a completed a private placement of convertible preferred stock, 15% of which was sold to existing investors. The funds would be used to expand the company's clinical trial activities including anemia, idiopathic pulmonary fibrosis and diabetic nephropathy. New clinical programs in acute renal failure and in rare diseases in anemia and in fibrosis would also be launched, and the metastatic cancers program extended. The funds would also be used for efficacy studies and commercial-scale manufacturing of injectable recombinant human collagen.

In September 2000, FibroGen completed a \$56.7 million private placement of convertible preferred stock.

R&D GRANTS

In April 1999, the Finnish government reported that it would fund 50% of the company's recombinant collagen and gelatin costs.

PRODUCT PORTFOLIO DRUGS

PLEASE NOTE: Highest status refers to highest development of that drug for one of the active companies

roxadustat

Drug Name	roxadustat
Key Synonyms	ciclopirox, roxadustat
Originator Company	FibroGen Inc
Active Companies	Astellas Pharma Inc, FibroGen Inc, AstraZeneca plc
Inactive Companies	Zeneca Group plc
Highest Status	Phase 3 Clinical
Active Indications	Anemia
Target-based Actions	HIF prolyl hydroxylase inhibitor
Other Actions	Erythropoietin modulator
Technologies	Oral formulation, Capsule formulation, Small molecule therapeutic
Last Change Date	14-Jul-2014

FG-3019

Drug Name	FG-3019
Key Synonyms	
Originator Company	FibroGen Inc
Active Companies	FibroGen Inc
Inactive Companies	Taisho Pharmaceutical Co Ltd
Highest Status	Phase 2 Clinical
Active Indications	Liver fibrosis, Diabetic nephropathy, Pancreas tumor, Glaucoma, Glioma, Focal segmental glomerulosclerosis, Idiopathic pulmonary fibrosis
Target-based Actions	Connective tissue growth factor ligand inhibitor
Other Actions	Angiogenesis inhibitor, Anticancer monoclonal antibody, Fibrosuppressant
Technologies	Monoclonal antibody human, Intravenous formulation, Infusion, Biological therapeutic, Protein recombinant
Last Change Date	30-Jun-2014

[Return to Table of Contents](#)

FG-2216

Drug Name	FG-2216
Key Synonyms	
Originator Company	FibroGen Inc
Active Companies	FibroGen Inc, Astellas Pharma Inc
Inactive Companies	Yamanouchi Pharmaceutical Co Ltd
Highest Status	Phase 2 Clinical
Active Indications	Anemia
Target-based Actions	HIF prolyl hydroxylase inhibitor
Other Actions	Erythropoietin release stimulator, Hematopoietic stimulant
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	05-Feb-2014

next generation HIF-PH inhibitors (anemia), FibroGen

Drug Name	next generation HIF-PH inhibitors (anemia), FibroGen
Key Synonyms	
Originator Company	FibroGen Inc
Active Companies	FibroGen Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Anemia
Target-based Actions	HIF prolyl hydroxylase inhibitor
Other Actions	Blood system agent
Technologies	Small molecule therapeutic
Last Change Date	02-Jan-2012

[Return to Table of Contents](#)

HIF-PH inhibitors (myocardial infarction/renal injury/stroke/multiple sclerosis), FibroGen

Drug Name	HIF-PH inhibitors (myocardial infarction/renal injury/stroke/multiple sclerosis), FibroGen
Key Synonyms	
Originator Company	FibroGen Inc
Active Companies	FibroGen Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Renal injury, Myocardial infarction, Stroke, Multiple sclerosis
Target-based Actions	HIF prolyl hydroxylase inhibitor
Other Actions	Cardiovascular agent, Renal system agent
Technologies	Small molecule therapeutic
Last Change Date	27-Dec-2011

FG-6874

Drug Name	FG-6874
Key Synonyms	
Originator Company	FibroGen Inc
Active Companies	FibroGen Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Anemia
Target-based Actions	
Other Actions	Unspecified drug target, Blood system agent
Technologies	Small molecule therapeutic
Last Change Date	06-Sep-2012
