Equity Research

Catalent, Inc.

CTLT: Initiating Coverage At Outperform

- **Summary.** We have initiated coverage of Catalent, Inc. with an Outperform rating and a 12-month valuation range of \$25-27. We believe the Pharmaceutical Services sector has favorable long-term trends and within that space, Catalent is positioned relative to peers with a stable and diversified business model, although one with certain company-specific challenges that we project will keep growth at the lower end of the industry range (5-10% organic growth for most public pharmaceutical services companies). Considering these factors, we view CTLT's valuation as reasonably attractive, with room for expanding multiples if Catalent successfully executes on growth opportunities to move its long-term growth profile higher. We set our FY2015E/2016E EPS at \$1.90/2.08.
- Stability and visibility. Within the Pharmaceutical Services sector, we believe Catalent has better-than-average long-term visibility for more than 70% of its business, which is a result of long-term supply contracts with generally predictable revenue recognition. Because Catalent is often included in customers' regulatory filings, commercial business tends to be extremely sticky.
- **Diversity.** Catalent's diverse client list helps offset the risk of any individual project, in our view. Each year, Catalent produces doses for nearly 7,000 products owned by approximately 1,000 customers, with no single product greater than 3% and no single customer greater than 10%. In our view, these metrics compare favorably to the broader Pharmaceutical Services industry.
- Regulatory and operational excellence. The contract manufacturing space is highly regulated, but also highly fragmented, a situation that has allowed highprofile mistakes by lower quality players to create negative publicity for the industry. We believe Catalent's stellar regulatory track record allows the company to command some degree of pricing premium, creating a moat around Catalent's strong high-teens operating margin.
- Possibility of accelerating growth. While we are not forecasting additional acceleration beyond Catalent's 5% revenue growth guidance, we believe the company has some upside potential from a growing portfolio of proprietary technologies, including delivery solutions for biologics, geographic expansion, additional client penetration, and the pursuit of adjacent markets (e.g., animal health).

Valuation Range: \$25.00 to \$27.00 from NA to NA

Our valuation range is DCF-based (WACC = 9.0%; terminal NOPLAT growth = 2%) and represents 13x our CY2015 EPS estimate. Risks include (1) short-term volatility, due to general order lumpiness; (2) potential for regulatory missteps; (3) weak product sales by customers; (4) control company status; (5) high leverage; and (6) FX volatility.

Investment Thesis:

We believe the Pharma Services sector has favorable long-term trends, and within that space, Catalent is positioned relative to peers with a stable and diversified business model, although one with lower growth. Considering these factors, we view CTLT's valuation as reasonably attractive, with room for expanding multiples if Catalent successfully executes on growth opportunities to move its long-term growth profile higher.

Together we'll go far

Company Description

Somerset, New Jersey-based Catalent, Inc. (NYSE: CTLT) leverages its proprietary drug delivery technologies to provide contract manufacturing services of final dose form pharmaceutical and consumer health products. Catalent also offers logistics and chemistry, manufacturing, and control (CMC) services for drugs in development.

The company has three segments: Oral Technologies (OT), Medication Delivery Solutions (MDS), and Development and Clinical Services (DCS). OT and MDS are sometimes referred to jointly as the Advanced Delivery Technologies (ADT) business. The OT segment primarily provides oral dose form manufacturing leveraging Catelent's softgel and modified release technologies. The MDS segment primarily provides dose form manufacturing for drugs administered via injection, inhalation, and ophthalmic routes, leveraging both traditional and advanced technologies. The DCS business provides manufacturing and logistics services for drugs in clinical trials as well as analytical testing for drug development.

Investment Thesis

Summary. We have initiated coverage of Catalent, Inc. with an Outperform rating and a 12-month valuation range of \$25-27. We believe the Pharmaceutical Services sector has favorable long-term trends and within that space, Catalent is positioned relative to peers with a stable and diversified business model, although one with certain company-specific challenges that we project will keep growth at the lower end of the industry range (5-10% organic growth for most public pharmaceutical services companies). Considering these factors, we view CTLT's valuation as reasonably attractive, with room for expanding multiples if Catalent successfully executes on growth opportunities to move its long-term growth profile higher.

Stability and visibility. Within the Pharmaceutical Services sector, we believe Catalent has better-than-average long-term visibility for more than 70% of its business, which is a result of long-term supply contracts with generally predictable revenue recognition. Catalent calls its strategy "follow the molecule," meaning the company strives to become involved with a molecule early in its life cycle by providing formulation and analytical services, which may then lead to a contract for clinical trial supplies and subsequently, a contract for commercial dose form manufacturing incorporating Catalent's drug delivery technology. Because Catalent is often included in customers' regulatory filings, commercial business tends to be extremely sticky and often allows the company to continue following the molecule from branded to generic to over-the-counter status. With this strategy, the company has cultivated some relationships that are more than two decades long.

Diversity. Catalent's diverse client list also helps offset the risk of any individual project, in our view. Each year, Catalent produces doses for nearly 7,000 products owned by approximately 1,000 customers. In its FY2013, Catalent did business with more than 80% of the top 200 global biopharmaceutical, generic, and consumer health companies. Similarly, over the past three years, Catalent earned revenue with respect to 80% of the 200 top-selling compounds globally. From a concentration standpoint, Catalent's top 20 products represented about 25% of revenue in FY2013, with no single product greater than 3% and no single customer greater than 10%. In our view, these metrics compare favorably to those of the broader Pharmaceutical Services industry.

Regulatory and operational excellence. The contract manufacturing space is highly regulated, but also highly fragmented, a situation that has allowed high-profile mistakes by lower quality players to create negative publicity for the industry. Catalent has more than 1,000 employees focused on quality and regulatory compliance and has successfully completed 239 regulatory audits over the past five years, in addition to hundreds of customer audits annually. Operationally, the company boasts 99% on-time delivery. We believe Catalent's stellar regulatory track record allows the company to command some degree of pricing premium. While price is certainly a consideration in almost any contract, it is hard for us to imagine the contract manufacturing space becoming commoditized to the point that pharmaceutical sponsors regularly forego operational excellence in favor of price concessions. Catalent's high-teens operating margin compares favorably to peers' in any segment of the pharmaceutical services sector, and we believe the company's operational and regulatory track record, creates a moat around this margin.

Possibility of accelerating growth. Catalent's long-term organic revenue growth guidance of 5% implies a modest acceleration from the 4% average constant dollar organic growth the company has seen over the past five years. While we are not forecasting additional acceleration beyond Catalent's guidance, we believe the company has some upside potential from a growing portfolio of proprietary technologies, including delivery solutions for biologics (such as Gene Product Expression, or GPEx, and SMARTag) and the recently launched ADVASEPT solution for glass-free injectable products. Catalent gives the number of new product introductions each year, and while that metric comes with heavy caveats (i.e., products can have widely varying economic

profiles), it is notable that Catalent's new product introductions expanded by 80%, to 175 in FY2014 from 97 in FY2013. Other potential drivers of accelerating growth include geographic expansion (recent investments in Brazil and market entry into China), additional client penetration (of Catalent's top 50 customers, nearly 75% use less than half of Catlent's service offerings), and the pursuit of adjacent markets (e.g., animal health).

Optimized capital structure. Catalent's stability and client diversity allow a greater capacity for leverage, in our view, which can be an important differentiator relative to pharmaceutical services peers. The company has a 4.4x pro forma leverage ratio following the initial public offering, which is above those of public peers. Many pharmaceutical services peers have shown an aversion to leverage, often citing client concentration or bookings volatility as a risk. Because those risks are lower for Catalent, in our view, we believe the company can benefit from a more optimal capital structure.

Investment Risks

Short-term volatility is common. While Catalent has a high degree of long-term visibility, deliveries can be lumpy, sometimes causing revenue slippage or unexpected mix shifts on a quarter-to-quarter basis. In order to smooth out short-term volatility over multi-quarter periods, we believe management will need to manage near-term Street expectations carefully. Management's experience with expectations management in the public markets is less robust than its operational experience, prompting us to adopt a wait-and-see view regarding management's ability to consistently meet its own guidance.

Maintaining a stellar regulatory and operational track record is not easy. Despite Catalent's outstanding regulatory track record, regulatory excellence is not easy or inexpensive to maintain, and the risk of a slip-up is nearly impossible to entirely mitigate. Such a regulatory mistake could have severe financial consequences, both in terms of investment requirements for remediation and in terms of lost revenue and earnings.

Sales volume of drug products is beyond Catalent's control. Catalent's revenue performance depends on end-user sales of the products Catalent manufacturers, although Catalent is unable to substantially influence those sales. To illustrate this risk, Catalent has highlighted a central nervous system (CNS) product launch that substantially missed the customer's forecasted sales target and caused a headwind for Catalent in FY2013.

Catalent may remain a controlled company. All shares issued in the initial public offering were primary shares. Consequently, affiliates of Blackstone may continue to own more than 50% of shares for some period of time, making Catalent a "controlled company" under corporate governance standards. As a controlled company, Catalent may elect not to comply with certain corporate governance standards pertaining to director independence. It is also possible that Blackstone will want to exit all or part of its position in one or more secondary offerings, which could affect the stock price.

Risks of operating with high leverage. Catalent's large debt load creates certain risks, such as constraints on raising capital, paying dividends, and the ability to invest to adapt to changing industry demands.

Risks of operation in foreign jurisdictions. Catalent receives more than 60% of its revenue from jurisdictions outside the United States. Risks of operating in international jurisdictions include foreign exchange risk, the challenges of complying with numerous regulatory regimes, and tax consequences, as well as increased risk of disruption due to conflicts.

Detailed Company Description

While Catalent divides its business into three segments (Oral Technologies, Medication Delivery Services, and Development and Clinical Services), we think it is useful to think of the first two of those segments as one business sharing similar characteristics, a business that Catalent sometimes calls Advanced Delivery Technologies (ADT), while the Development and Clinical Services (DCS) business has entirely separate characteristics.

The ADT business provides contract manufacturing of final dose forms for commercial pharmaceutical and consumer health (e.g., vitamin) products that generally require specialized delivery technologies. Final dose forms represent the product in the form consumed by the patient. Final dose form manufacturing is a distinct part of the value chain from active pharmaceutical ingredient (API) manufacturing. Catalent does not manufacture API; instead, it uses its proprietary delivery technologies to place API provided by others into a form consumable by patients. For example, Catalent provides final dose form manufacturing for Advil Liqui-Gels: Catalent provides the softgel technology and encapsulates the drug in the softgel, but does not make the active drug product itself. Catalent's main delivery technologies include oral methods (primarily softgels and modified-release tablets), as well as pre-filled syringes and blow-fill-seal (BFS) packaging. The ADT business is sometimes called the "long-cycle" business because contracts for drug supply are typically long term (sometimes as long as ten years). ADT represented about 78% of Catalent's total FY2014 revenue.

While the ADT business deals with commercialized products, the DCS business (22% of FY2014 revenue) provides services for pharmaceutical products still in development. The business is sometimes called the "short-cycle" business because contracts tend to be shorter than for ADT contracts. The services provided in DCS fall into two main groups: Clinical Supply Solutions and Development & Analytical Services. Clinical Supply Solutions provides logistics (manufacturing, packaging, storage, and inventory management) for drug in clinical trials. Development and Analytical Services provides chemical and cell-based testing, stability testing, bio-analytical testing, and a variety of other services that fall under chemistry, manufacturing, and control (CMC) activities.

Most of Catalent's contracts are fee-for-service contracts. Out of approximately 7,000 products, fewer than 40 have a royalty or other value-based pricing mechanism, with 3% or less of Catalent's revenue coming from royalties, by our estimate. Because many contracts are long term in nature, they often involve built-in price increases based on a stated index.

Catalent's contracts encompass a wide variety of product categories, including the following:

- Branded drugs. Branded prescription pharmaceuticals account for about 44% of Catalent's revenue and
 typically carry the most attractive economics for Catalent. Catalent indicates that more than 50% of
 pharmaceutical prescription revenue is derived from products requiring complex dose forms and that 6090% of new molecules will need advanced delivery technologies. Examples of branded products supplied
 by Catalent include Fragmin, Imbruvica, and Zyprexa.
- **Generic drugs.** Catalent is often able to follow a molecule from its life as a branded product to its life a generic product (either branded, or unbranded). Generics account for about 13% of Catalent's revenue. Examples of generic products supplied by Catalent include Amnesteem, Cholestyramine, and bupropion hydrochloride.
- **Biologics and biosimilars.** Biologic drugs, which account for about 10% of Catalent's revenue, often require specialized delivery technologies. Examples of biologic products supplied by Catalent include Pulmozyme and Gamunex.
- Over-the-counter (OTC) products. Continuing to follow the molecule as it moves from a generic to an over-the-counter manifestation, Catalent has a large portfolio of OTC products, including Advil, Benadryl, and Claritin. OTC accounts for about 14% of revenue.
- Vitamins and supplements. Catalent provides a variety of consumer health products, including Vitalux, Centrum, and Ocuvite. Vitamins and supplements account for about 17% of Catalent's total revenue.
- **Skin care.** Skin care is Catalent's smallest product category, currently representing about \$30 million (or 2%) of revenue, although the company believes this could be a \$100 million opportunity over time. Examples include AgeLoc Tru Face Essenceultra, Elizabeth Arden Whitening Capsules, and Cindy Crawford's Meaningful Beauty.

As of FY2013, Catalent derived 38% of revenue from the United States, 47% from Europe, and 15% from other geographies.

Business Lines And Market Dynamics

Catalent divides its ADT business into two segments: Oral Technologies (OT), which primarily provides softgel and modified release products; and Medication Delivery Services (MDS), which is a catchall for any final dose manufacturing that does not fit into the OT segment, the largest of which are pre-filled syringes and blow-fill-seal (BFS) packaging, though Catalent is also making a push into innovative delivery methods for biologics.

Source: Company data; Wells Fargo Securities, LLC estimates					<u> </u>

Oral Technologies Segment (OT). The OT segment accounts for 66% of Catalent's FY2014 revenue, 47% from softgels and 19% from modified release. The segment has the highest margin, and therefore, accounts for more than 70% of profit.

Within the softgel business (47% of total revenue), about 60% of softgel revenue (or 28% of total revenue) is from prescription products, with the remaining 40% (or 18% of total revenue) from consumer health products. Catalent has the leading market position in softgels with more than 30% share of a market that remains fragmented. Other competitors include the Banner Pharmacaps subsidiary of DPx, the SwissCaps subsidiary of Aenova, Procaps, and Capsugel. The RP Scherer softgel technology, which has a long legacy dating back to the 1930s and which was acquired by Cardinal Health in 1998, forms the backbone of the softgel business. Catalent indicates that 90% of FDA new chemical entity softgel approvals in the past 25 years have used RP Scherer softgel technology. Catalent also offers several enhancements to the base softgel technology, including Optishell (an option for semi-solids with a higher fill temperature), Optigel Lock (an abuse deterrent), and Vegicaps (a plant-derived shell).

The modified release business accounts for 19% of total revenue (nearly 30% of the OT segment). Catalent offers a range of immediate and controlled release technologies for solid oral dose forms. Catalent has the leading position in this segment of the market, although it is also very fragmented, and a significant amount of work remains in-house at pharmaceutical companies. Brands in the modified release business include Zydis (fast-dissolve tablets), OptiDose (dividable tablets), and OptiMelt. Zydis is the leading brand in this segment, with more than 20 formulations marketed globally. It is particularly useful for anti-psychotics to improve patient compliance (it dissolves in the mouth in about three seconds).

Medication Delivery Services (MDS). The MDS segment captures all commercial manufacturing that does not fit into the OT segment. The segment as a whole accounts for about 12% of total revenue. The largest businesses in this segment are pre-filled syringes (about 50% of the segment) and blow-fill-seal (BFS) packaging (about 30-40% of the segment). The remainder of the segment includes technology for biologics (GPEx and SMARTag), as well as inhalation products. BFS technology is a method of filling plastic containers in a sterile environment, which is often needed for ophthalmic products. BFS is also used for Catalent's ADVASEPT glass-free vials. We believe Catalent has the leading market position in pre-filled syringes and the No. 2 market position in BFS.

Discovery And Clinical Services (DCS). The DCS segment offers services for products still in development. It makes up about 22% of total revenue, which is split approximately evenly between the segment's two major business lines: Clinical Supply Solutions and Development & Analytical Services.

The Development & Analytical Services business provides a wide range of laboratory and manufacturing services needed during the drug development process, including formulation, stability testing, and bioanalytical testing. We believe Catalent holds the No. 2 position in the market after PPD, with DPx, AAI, and

Almac also having solid positions. These players account for about 25% of the market, with the remaining 75% being highly fragmented.

The Clinical Supply Solutions business provides logistics for clinical trials, including comparator sourcing, manufacturing, packaging, storage, and inventory management. This market is fairly consolidated and is dominated by Thermo Fisher, with Catalent and Almac vying for the No. 2 position.

Operations

Facilities And Work Force. Catalent has more than 8,000 employees and operates 27 facilities encompassing nearly 5 million sq. ft. of manufacturing and lab space (see Exhibit 2). The company's largest facilities for the OT segment are in Eberbach, Germany, Somerset, New Jersey, Swindon, United Kingdom, and Buenos Aires, Argentina. The largest facilities for the MDS segment are in Brussels, Belgium and Woodstock, Illinois. The largest labs in the DCS segment are in Kansas City, Missouri, Bathgate, United Kingdom, and Morrisville, North Carolina.

Recent and future capital projects include the following: (1) a \$35 million expansion of the Winchester, Kentucky facility, which produces modified release products, to nearly double its capacity; (2) a new lab in Japan to provide proof-of-concept and feasibility studies for Zydis; (3) a \$20 million expansion of the Morrisville, North Carolina plant to increase capacity in inhalation formulation and development; and (4) plans to refurbish the St. Petersburg, Florida site in FY2016.

Sales And Marketing. Catalent describes its sales and marketing program as a hybrid demand generation model, with dedicated account teams offering the full breadth of Catalent's solutions to select global accounts (accounting for about 37% of Catalent's revenue in FY2013), while technical specialist teams provide in-depth knowledge for each individual offering. The sales organization currently consists of more than 150 full-time

employees. Catalent's marketing program is focused on brand-building through trade-shows, print, and online advertising.

Intellectual Property. Catalent holds approximately 1,300 patents worldwide, which the company believes differentiates it from other contract manufacturers. In some cases, Catalent licenses its technology to third parties.

Seasonality. Catalent's revenue tends to be substantially seasonal, with the average proportion of revenue recognized in FQ1-FQ4 as follows: 23%, 24%, 25%, 28%, which is approximately consistent across segments. EBITDA follows a similar seasonality pattern, but is even more exaggerated, with the average proportion of EBITDA recognized in FQ1-FQ4 as follows: 20%, 23%, 26%, and 31%.

Exhibit 3. Average Quarterly Seasonality

Seasonality	FQ1	FQ2	FQ3	FQ4
OT revenue	22.4%	24.2%	25.5%	28.0%
MDS revenue	23.2%	23.5%	25.6%	27.7%
DCS revenue	23.1%	22.8%	24.8%	29.3%
Cons. Rev.	22.7%	23.9%	25.3%	28.1%
OT EBITDA	18.9%	23.3%	25.9%	31.9%
MDS EBITDA	14.3%	21.5%	28.4%	35.7%
DCS EBITDA	22.0%	22.7%	25.4%	30.0%
Cons. EBITDA	19.7%	23.2%	26.1%	31.0%

Source: Wells Fargo Securities, LLC

Concentration. Catalent's top product accounts for less than 3% of revenue. The top 20 products account for about 25% of revenue. No single customer accounts for more than 10% of revenue.

Company History

Catalent has been built via acquisitions, first as the Pharmaceutical Technologies and Services (PTS) segment of Cardinal Health (from 1996-2007) and subsequently as an independent company owned by The Blackstone Group.

Cardinal began acquiring the assets that would become Catalent in 1996 with PCI Services, a packaging business that would subsequently be divested in 2012. The 1998 acquisition of softgel pioneer and industry leader RP Scherer, which has a corporate history dating back to 1934, remains the largest acquisition in the company's history. Additional acquisitions made by Cardinal include Automatic Liquid Packaging in 1999, which brought flow-fill-seal technology; Magellan Labs in 2002, which represented the company's entry into the analytical services market; and Intercare Group in 2003, which brought injectable manufacturing assets.

Following the emergence of Catalent as a private company under Blackstone's ownership in 2007, and with new leadership in place in 2009, the company began divesting non-core assets, the most substantial of which was the commercial packaging business in 2012. The company also made several additional acquisitions, including the clinical trial supplies of Aptuit in 2012.

Management And Board

Catalent has an experienced management team, with several executives having long track records at GE Healthcare. Several others have come up through the ranks internally, including experience at Catalent's former parent company, Cardinal Health.

Catalent's board of directors has significant representation from Blackstone, Catalent's majority owner. As a controlled company, Catalent is not subject to regulations around director independence.

Recent Financials And Outlook

Revenue. From FY2009 through FY2014, Catalent's constant dollar organic growth averaged about 4%, but was notably higher in FY2009-FY2012 than in FY2012-FY2014. Catalent has noted that the failed launch of a CNS product adversely affected FY2013 OT segment revenue. Other headwinds to FY2013 and FY2014 constant dollar organic growth include (1) the switch by one softgel customer to a lower priced but longer term contract; (2) the timing of a mix shift toward consumer softgel products in FH1 2014; (3) softness in pre-filled syringes in the MDS segment; and (4) decreased customer orders in the DCS segment in FH1 2014, due to site consolidations.

Management expects constant dollar organic growth to reaccelerate to about 5% over the long term, which seems reasonable as the headwinds experienced in FY2013 and FY2014 roll off, and with the new product pipeline up 80% in FY2014. While we are not modeling for additional growth beyond management's guidance, we see potential for some modest upside should the company execute on growth initiatives in new technologies, new geographies, and new markets.

Margin. The company uses EBITDA margin as its primary measure of operational performance (a legacy of private equity ownership, we suspect), although we prefer to use operating margin. Long-term guidance is for 7% organic EBITDA growth, which implies about 50 basis points (bps) of annual margin expansion, when combined with the 5% revenue growth guidance.

Taxes. Catalent should experience an effective tax rate below 15% through at least FY2017E, due to an accumulation of net operating losses under private equity ownership.

Free Cash Flow. With its high margin, Catalent generates strong operating cash flow, but the business is also fairly capital intensive. Management has guided to capex of about \$115-125 million in FY2015 and has indicated about \$45-55 million per year is the historical run rate for maintenance capex. With FY2015 containing some one-time items around the IPO, we believe the normalized FY2016E free cash flow could exceed \$200 million.

Use of Cash. Catalent expects additional bolt-on acquisitions to be a part of the growth story. Catalent is looking for high-quality businesses with differentiation, with potential areas of interest being emerging markets, certain consumer health products, and possibly some consolidation of the softgel market. Management has indicated that cash will also be used for ongoing deleveraging, with 3.5x being the leverage ratio management would be comfortable sustaining.

Valuation

Absolute. Our discounted cash flow model is supportive of a \$25-27 valuation range, even with modest assumptions, such as revenue growth remaining at or below 5%, and very slight expansions of the operating margin. Additionally, while it is difficult to determine cost of capital for a company without a track record in the public markets, we use a discount rate that is above the industry average, due to Catalent's highly leveraged balance sheet, which carries some risk, despite the low cost of debt. However, we think this is a conservative assumption.

Relative. Catalent does not have particularly good comps given its differentiated business mix. We highlight WST as arguably the best comparable, while the rest of the pharmaceutical services space serves as a decent benchmark, though most companies are expected to grow faster than Catalent. Catalent's highly leveraged balance sheet also makes accurate relative valuation a challenge.

Based on our CY2015 estimates, Catalent trades at 11.3 CY2015 EBITDA, a slight premium to the pharmaceutical services peer group. Catalent also trades at 11.4x our CY2015 EPS, which compares to 19.1x for the pharmaceutical services group. It is difficult to determine which multiple is best, with one being at a premium and the other at a discount. To resolve the issue, we turn to a normalized multiple, adjusted EV / NOPAT. Based on this metric, Catalent trades at 15.7x our 2015 estimate, which compares to 18.6x for the group. However, if we normalize Catalent's tax rate, given the company has significant net operating loss carryforwards to use, the company trades approximately in-line with the group, which we think is an accurate representation of the relative valuation.

Additional Information Available Upon Request

I certify that:

- 1) All views expressed in this research report accurately reflect my personal views about any and all of the subject securities or issuers discussed; and
- 2) No part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by me in this research report.
- Wells Fargo Securities, LLC maintains a market in the common stock of Catalent, Inc., WuXi PharmaTech, Inc., Quintiles Transnational Holdings, Inc., ICON plc, PAREXEL Int'l Corporation, Charles River Laboratories Int'l, Inc., Covance Inc.
- Wells Fargo Securities, LLC or its affiliates managed or comanaged a public offering of securities for Quintiles Transnational Holdings, Inc., Catalent, Inc. within the past 12 months.
- Wells Fargo Securities, LLC or its affiliates intends to seek or expects to receive compensation for investment banking services in the next three months from Catalent, Inc., Quintiles Transnational Holdings, Inc.
- Wells Fargo Securities, LLC or its affiliates received compensation for investment banking services from Quintiles Transnational Holdings, Inc., Catalent, Inc. in the past 12 months.
- Wells Fargo Securities, LLC and/or its affiliates, have beneficial ownership of 1% or more of any class of the common stock of Quintiles Transnational Holdings, Inc., Covance Inc., Charles River Laboratories Int'l, Inc., PAREXEL Int'l Corporation.
- Quintiles Transnational Holdings, Inc., Catalent, Inc. currently is, or during the 12-month period preceding the date of
 distribution of the research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided investment
 banking services to Quintiles Transnational Holdings, Inc., Catalent, Inc.
- Quintiles Transnational Holdings, Inc. currently is, or during the 12-month period preceding the date of distribution of the
 research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided noninvestment banking
 securities-related services to Quintiles Transnational Holdings, Inc.
- Wells Fargo Securities, LLC received compensation for products or services other than investment banking services from Quintiles Transnational Holdings, Inc. in the past 12 months.
- Wells Fargo Securities, LLC or its affiliates has a significant financial interest in Quintiles Transnational Holdings, Inc., PAREXEL Int'l Corporation, Charles River Laboratories Int'l, Inc., Covance Inc.

CRL: Risks include:(1) cancellations or delays due to client M&A, economic weakness, pipeline reprioritization, or compound failure; (2) a reversal in the trend toward increased outsourcing; (3) regulatory scrutiny; (4) increased competition; and (5) risks associated with M&A.

CTLT: Risks include (1) short-term volatility, due to general order lumpiness; (2) potential for regulatory missteps; (3) weak product sales by customers; (4) control company status; (5) high leverage; and (6) FX volatility.

CVD: Risks include: (1) project cancellations or delays due to M&A, economic weakness, pipeline reprioritization, or compound failure; (2) a decline in backlog conversion rates; (3) regulatory scrutiny; and (4) increasing competition.

ICLR: Risks include: (1) project cancellations or delays due to client M&A, economic weakness, pipeline reprioritization, or compound failure; (2) a reversal in the trend toward increased outsourcing; (3) increasing client concentration; (4) margin pressure from strategic relationships; (5) increased regulatory scrutiny; and (6) underperformance in central lab

PRXL: Risks include: (1) project cancellations or delays due to client M&A, economic weakness, pipeline reprioritization, or compound failure;(2) high client concentration; (3) margin pressure from strategic relationships; (4) increased regulatory scrutiny; and (5) foreign exchange volatility.

Q: Risks include: (1) project cancellations or delays due to client M&A, economic weakness, pipeline reprioritization, or compound failure; (2) a reversal in the trend toward increased outsourcing; (3) lack of improvement in the IHS segment; (4) margin pressure from strategic relationships; (5) foreign exchange volatility; and (6) large insider ownership.

WX: Risks include: (1) Margin pressure from wage inflation, RMB appreciation, pricing pressure, and investments; (2) potential missteps during business expansions; (3) M&A risks; (4) risks associated with Caymans domicile; and (5) regulatory scrutiny.

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions. Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING

1=Outperform: The stock appears attractively valued, and we believe the stock's total return will exceed that of the market over the next 12 months. BUY

2=Market Perform: The stock appears appropriately valued, and we believe the stock's total return will be in line with the market over the next 12 months. HOLD

3=Underperform: The stock appears overvalued, and we believe the stock's total return will be below the market over the next 12 months. SELL

SECTOR RATING

O=Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

M=Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

U=Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

VOLATILITY RATING

V = A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: September 9, 2014

Equity Research are rated Outperform.

49% of companies covered by Wells Fargo Securities, LLC Wells Fargo Securities, LLC has provided investment banking services for 44% of its Equity Research Outperform-rated companies.

49% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Market Perform.

Wells Fargo Securities, LLC has provided investment banking services for 32% of its Equity Research Market Perform-rated companies.

3% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Underperform.

Wells Fargo Securities, LLC has provided investment banking services for 11% of its Equity Research Underperform-rated companies.

Important Disclosure for International Clients

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a U.K. incorporated investment firm authorized and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 ("the Act"), the content of this report has been approved by WFSIL a regulated person under the Act. WFSIL does not deal with retail clients as defined in the Markets in Financial Instruments Directive 2007. The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC is exempt from the requirements to hold an Australian financial services license in respect of the financial services it provides to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under U.S. laws which differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC in the course of providing the financial services will be prepared in accordance with the laws of the United States and not Australian laws.

Hong Kong - This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance, "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO).

Japan - This report is distributed in Japan by Wells Fargo Securities (Japan) Co., Ltd, registered with the Kanto Local Finance Bureau to conduct broking and dealing of type 1 and type 2 financial instruments and agency or intermediary service for entry into investment advisory or discretionary investment contracts. This report is intended for distribution only to professional investors (Tokutei Toushika) and is not intended for, and should not be relied upon by, ordinary customers (Ippan Toushika).

The ratings stated on the document are not provided by rating agencies registered with the Financial Services Agency of Japan (JFSA) but by group companies of JFSA-registered rating agencies. These group companies may include Moody's Investors Services Inc, Standard & Poor's Rating Services and/or Fitch Ratings. Any decisions to invest in securities or transactions should be made after reviewing policies and methodologies used for assigning credit ratings and assumptions, significance and limitations of the credit ratings stated on the respective rating agencies' websites.
